

## Great interest in Flying Prober at the Ohio Expo

**Digitaltest had a strong presence at the "Ohio Expo & Tech Forum" on July 13, 2018. Among other products, we presented the flying probe tester Condor. The high adaptation depth and test coverage, which the Condor offers, thanks to the four movable test heads, particularly impressed the visitors.**

The Tech Forum, in particular, brought many knowledgeable test experts to the fair, so that numerous interesting discussions were held. Digitaltest was very convincing here with the multiplicity of test solutions - from the flexible 19-Inch-tester, up to the in-circuit tester in the high-speed range.

### **Complete software solutions**

In addition, Digitaltest was able to score with sophisticated and comprehensive software packages. The CAD/CAM software C-LINK DTM automatically translates the design data from the CAD system to the test system. Here, the Digitaltest system software CITE is used, with which test programs can be created quickly and easily. In quality management at the end of the production line, QMAN helps all common test systems to repair faster and to observe and evaluate the manufacturing process.

### **A successful day**

Thus a successful day for Digitaltest USA came to an end on the evening of the fair. A day full of new contacts, professional exchange and interested questions.

### **About Digitaltest**

As a leading partner in the electronics industry, Digitaltest develops and produces automated test equipment (ATE) for electronic circuit boards, software for automating production, and quality management systems. Digitaltest is known for innovative solutions for optimizing the entire manufacturing process – as an interface between CAD, the testing process and production itself. We also offer comprehensive service and support, including complete outsourcing of PCB testing at locations worldwide.

Rely on our over 35 years of cutting-edge technology, reliability and long-term value in automated testing systems.
