Online Usermeeting 2020

Thursday, October 1st, 2020, 09:00 AM – 10:30 AM

C-LINK user webinar & workshop:

Learn more about the new implementation of Black-Annotation with more functions and easier handling through benefit support. Furthermore we will talk about the new JTAG netlist format JTN 2.0. C-LINK from Digitaltest is the first CAD/CAM solution on the market that supports the actual format.

Thursday, October 8th, 2020, 09:00 AM – 10:30 AM

QMAN & CORS user webinar & workshop:

You get news about our QMAN software and the corresponding Complete Optical Repair Solution (CORS). Among other things we will show you application examples at a complete repair station with a high-resolution camera system, which is centrally remote controlled via QMAN.

Thursday, October 15th, 2020, 09:00 AM – 10:30 AM

CITE user webinar & workshop:

You will learn more about the current features of our system software CITE 8 with the New Automatic Program Generator 2.0 (APG 2.0) and, also new, the automatic DebugRobot as well as the limited rights assignment for Windows and a new interface with remote control options.

Thursday, October 22nd, 2020, 09:00 AM – 10:30 AM

Application user webinar & workshop:

You will receive tips and tricks from the application with valuable information for everyday practical work on test program creation and optimization as well as other topics from current (customer) applications. We will provide information about testing the UUT current consumption in the micro range, about simple structures for measurement repetitions, mean value tests and much more.

Thursday, October 29th, 2020, 09:00 AM – 10:30 AM

Condor Flying Probe user webinar:

Enjoy a presentation about the latest Condor Flying Probe innovations (fixture for Condor, LED Test, Programmer, Boundary Scan and much more).
